

SAFETY PROCEDURES

WITH MCCUE

SAFETY IS OUR TOP PRIORITY

Accidents can be prevented by adopting safe working procedures and wearing the correct PPE. Safety must be a priority to eliminate workplace injuries and to make sure that all installation environments are safe for everyone near.

NEED MORE INFORMATION?

Call us at today (978) 741-8500 or send us an email at safetybollard@mccue.com

Employers are responsible for providing a safe and healthy workplace for their employees.

Personal protective equipment — or PPE — is equipment worn to minimize exposure to a variety of hazards. The following items of PPE should be properly used at each installation:

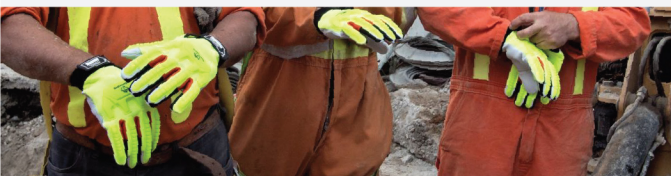

Steel toed boots

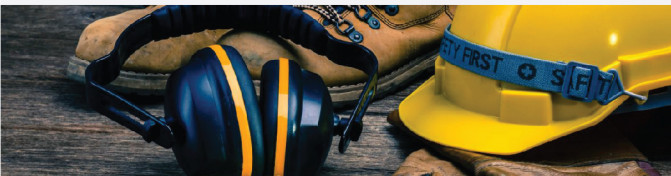

High visibility vests & clothing

Safety glasses & respirators while handling & mixing concrete

Gloves or hand protection

Hearing protection when noise exceed 85 decibels, this includes operating generators, core drilling equipment, skid steers and other machinery.

SAFETY REQUIREMENTS

Our business is built on safety and it's our top priority. Everyone installing McCue products must adhere to the following job site safety requirements at all times.

The perimeter of all work zones must be marked by using a Banner Stakes Barricade System or McCue approved similar system.

Never leave open holes under any circumstances. All open holes must be covered by McCue-approved hole covers.

Always scan for underground utilities. Don't dig without locating all utilities and potential hazards in the area.

If there are unforeseen circumstances during excavation, stop, power off all equipment, clear the area and contact McCue or appropriate parties immediately.

Inspect all heavy machinery and power tools prior to use. Make sure they're in good working condition.
