

LET'S ADD A LITTLE SOMETHIN', SOMETHIN' TO YOUR BOLLARDS

# CRASHCORE SIGNAGE

Why not kill two birds with one bollard? Add a sign to our CrashCore Bollard for compliance and complete protection. Easily add an accessible sign to transform CrashCore into a crash-tested, ADA compliant sign.

#### Compliance

With a simple addition of an ADA sign to your bollard, you can stay compliant.

#### Peace of mind

Adding a crash-tested bollard to your signage gives you the comfort of knowing your people are protected.

#### Add Any Placard

We can match your bollards with any sign or style, so you don't compromise your design.

#### Did you know?

In most jurisdictions, ADA signs must be at least 60" above the ground. We place the bottom of our placards at 84", so signs do not become a hazard to pedestrians.

### 4" PLASTIC BOLLARD WITH SIGN POST

#### PRODUCT NUMBERS
