

I Beam Protection Kit

I Beam Protection Kit is specifically designed to protect columns in the sales floor and mezzanine environments. Manufactured from grade 304 stainless steel, the kit provides robust protection that is suitable for internal and external use. The modular kit has been designed to be cut and altered to fit any column size variations.

- ! Robust, durable stainless steel with a visually esthetic satin polished finish
- ! Nylon joining spigots for a seamless connection between tubes
- ! Modular to accommodate any column size variations
- ! Simple installation process
